(HealthNewsDigest.com) - Bowling Green, Florida - Men's Shaving & Complexion Botanical Cleansing Bar, is a one-of-a-kind organic soap that treats the complexion while doubling as a shaving cream. Formulated to gently calm skin that is prone to irritations, the new bar is made from soothing and cooling ingredients such as Shea butter, Oakmoss and 10% certified organic Neem.

The new 4 oz. bar is more than 90% organic and promises to moisturize and lubricate for a close, clean shave that nourishes the skin. The product does not contain animal ingredients, preservatives or synthetic color and fragrance. In addition, the robust aromas of Oakmoss and Cedarwood have been found to be a favorite with men. The bar is long lasting and retails for a suggested \$6.95.

Organix-South offers a completely unique process when it comes to making its handcrafted soaps! Using the old fashioned and time-consuming process called "cold-process", the company has created bars that are actually good for the skin and do not strip the oils or dry out the dermis in any way. While the slow-cure process creates a superior soap, it does require a significant amount of energy, which is why the company uses a solar drying and cooling operation as well as a solar hot water heater that serves the entire plant. Adds Autumn, "Good for the skin and good for the planet – that's our mission!"

For information, see www.organixsouth.com or call 888.989.NEEM.
